DENTIS RECYCLING ITALY S.r.l.

Founded in 1987, Dentis specializes in recycling PET.

PET from household recycling or production waste arrives at Dentis, where it is processed to become a secondary raw material.
The facilityâ€™s current capacity is 40,000 tons a year, the equivalent of around 1.3 billion bottles.
Dentis-recycled PET is called PETALO, and comes in the flakes typical of the recycled plastic.
A unique characteristic of PETALO is 100% homogenous crystallization, facilitating the production of new objects from the recycled material.
