

WoPa is a promoter of useful projects with regard to work, culture, education and social issues. The establishment of the association was promoted by Ordine degli Architetti di Parma - assignee of the urban spaces - following the "Workout Pasubio", a participatory planning path held in November 2014, in which the citizenship was invited to reflect on how to re-use the pavilions of the Ex Manzini an area of 3000 sq/m.

On that occasion it was expressed the desire to reuse immediately the premises of the former factory. At the WoPa it is possible to plan events or initiatives in agreement with the "Workout Pasubio" association. Anyone (citizens, associations, institutions, companies, etc.) can make proposals for using the various premises. The projects will be evaluated by the association and accepted on the basis of their consistency with respect to the goals of regeneration and retraining, to their usefulness with respect to the topics of work, culture, education and sociability and the ability to weld new solidarity networks in the local community.

WOPA's activities are varied: conferences, educational workshops for adults and children, book presentations, art exhibitions, reuse markets and local products, theatre performances, concerts, cocktails, evenings with DJ sets.
