Emilia Romagna nursery system (IT): Reggio Emilia, thanks to its over 80 educational services aimed at children from 0 to 5, manages to keep short the lists of children waiting for a nursery or kindergarten placement. The pedagogical model of Reggio structures, all provided with ateliers, real doing and thinking places, accommodates children who colour, mould, build their ideas, and changes with the changing world. Rudolf Steiner School Every lesson at Steiner is guided by dynamic interplay between students and teachers. We believe strongly that young people are best served when their teachers' striving for truth and social justice is worthy of emulation. Through the practice of Waldorf education, our teachers open the students' eyes to the world around them with ever-deepening levels of sophistication. Whether in science or math, language arts or history, sports or art, our aim is to inspire mastery, compassion, and self-confidence. Because learning at our school is a joyous activity, our students carry a passion for it throughout their lives.Â
