

CONSUL is:

Free - As it is an open software platform all its code can be used by any person or entity.

Customisable - Any entity can freely modify it to suit its requirements.

Secure - It features a registration system that protects privacy. It can be integrated with existing register and census systems.

On-going support - From the technical and development teams, as well as insight from other institutions that are using it across the world.

Source - CONSUL.
