

Proyecto Aqualina

Aqualina is an environmental project, necessary and non profit, that aims essentially to encourage environmental values and actions

Aqualina was created in 2003 and since then it has been working to make more people aware about the most urgent problems that faces the environment. Through its messages and ways of doing, the project has the mission to promote the environmental education and transmit it to great masses, mainly children. With this, Aqualina aims to create a change in the attitudes of the crowds, and mobilize them in favor of the environmental health. Aqualina es un proyecto ecológico, necesario y no lucrativo, que busca esencialmente alentar acciones y valores ambientalistas. A través de su accionar y sus mensajes, Aqualina tiene la misión de transmitir educación ambiental a las grandes masas, principalmente, a las niñas y niños, para ir logrando un cambio de actitud en las personas y movilizar sus mentes a favor de la salud del Medio Ambiente.
