The Carbon Disclosure Project

Green energy for companies and cities

The Carbon Disclosure Project (UK) is an independent not-for-profit organization working to drive greenhouse gas emissions reduction and sustainable water use by business and cities. The network can provide a transformative global system for thousands of companies and cities to measure, disclose, manage and share environmental information. When provided with the necessary information, market forces can be a major cause of change. Working with the world's largest investors, businesses and governments, CDP is uniquely positioned to catalyze action towards a more sustainable economy.
