NEF - the new economics foundation (UK) is an independent think-and-do tank that inspires and demonstrates real economic well-being with the aim to improve quality of life by promoting innovative solutions that challenge mainstream thinking on economic, environment and social issues. Founded in 1986 by the leaders of The Other Economic Summit (TOES) which forced issues such as international debt onto the agenda of the G7 and G8 summits, NEF's strategy is to combine rigorous analysis and policy debate with practical solutions on the ground, often run and designed with the help of local people. NEF also creates new ways of measuring progress towards increased well-being and environmental sustainability. NEF works with all sections of society in the UK and internationally - civil society, government, individuals, businesses and academia - to create more understanding and strategies for change.
