Green Car Congress (USA) Green Car Congress's mission is to provide timely, high-quality editorial about the full spectrum of energy options, technologies, products, issues and policies related to sustainable mobility. Main goals are: to provide timely and accurate reporting and analysis of relevant developments around the world and to take the panoptic view, providing comprehensive coverage and the context critical to understanding and evaluating our emerging energy options. The association's audience comprises members of every segment of the energy and transportation markets: industry, government, academia and the public.
