The educational component of the 8 FESTIVAL DE PERFORMANCE DE CALI enables the younger generation to be an active audience through talks and workshops during the month prior to the Festival week. It will have an intensive programming in schools and universities in the city and it will be directed also to various civilian community spaces scattered throughout the city, taking into account their needs and possibilities. The Escuela will reconsider the theoretical components and formats during the previous Festivals. The interests of the Festival are focused on the exploration of the context through spaces that allow the active participation and exchanges at various levels related to aspects of daily life. One of the objectives of this program of the Festival is to create the conditions for direct dialogue and common concerns, promoting mutual understanding.
