Empowering successful worker cooperatives through business consulting from the cooperative movement

A project of the U.S. Federation of Worker Cooperatives, The Democracy at Work Network provides affordable business consulting services to worker cooperatives and cooperative development organizations. Our team of certified peer advisors is made up of worker-owners of successful worker cooperatives who engage in a year-long training program to gain the skills to move from a successful business person to a successful cooperative peer advisor. The Democracy at Work Network is helping to build a new, cooperative economy by making business services available to worker cooperatives that build them as businesses and as cooperatives. Our services include strategic and financial planning, governance and democratic systems design, ongoing financial and communications training and start up and expansion planning.
