Wymiennik - a non-profit Community Exchange System is a way of creating viable alternative economy based on principles of social justice and equal rights outside of the corrupt, debt-based monetary system. Every user can freely exchange his/her goods and talents without using conventional mean of exchange, namely money. Instead, CES is based on registering transactions valued by agreement between the two parties involved in exchange. This way we're getting money back to the commons! CES is economical as well as social project. By enabling everyone to participate in the local economy, we're fostering social coherency and trust
