Grassroots steps to a Greener Fairer and Steady-State Manchester We are inviting individuals, community groups, campaigning groups and, well, everyone who believes that economic growth canâ€™t go on to join us in creating a plan for a greener, fairer, climate-safe Manchester, within a specific framework of steady-state economics. The plan will list things that Mancunians can do in the short-term, the things that councils can do to help them achieve those things, and things that councils and businesses can do. The report will be released in October 2012, and accompanied by videos, briefing papers, public meetings and much more.
