IIX is the home of Asia's first private and public platforms for Social Enterprises (SEs) to raise capital efficiently

IIX provides Social Enterprises (SEs) in Asia with greater access to capital, allowing them to rapidly expand the impact of their activities. Through its investment platforms, IIX connects SEs with Impact Investors that value the social impact these SEs create. IIX benefits Impact Investors by giving them access to a group of investment-ready SEs with strong corporate governance practices and a commitment to transparent reporting of both financial and social results, and by providing a source of liquidity.
