

ONG EDUCAR PARA VIVIR

NGO which works defending the Human Rights as a tool to achieve a social justice of the human being

On the horizon of our philosophy our goal is to denote the transformer reach of education for development, which we intend to inculcate in different social contexts where we work. Education is not only a basic human right it is also an essential component of economic and social development. In fact, properly planned actions and investments in education, you get a good dividend, and especially in less developed countries, where poverty reduction is achieved. ALMANSA, SPAIN
