Economics for Ecology International Scientific Conference in Sumy, Ukraine was started by students of Sumy State University in 1992. P-CED became involved in 2009 during the 15th annual conference. Our approach was to begin to provide students with a comprehensive understanding of economics for ecology in an overall context of economics in transition. The world economy, including Ukraine's, had been hit hard by the economic meltdown in autumn of 2008. For the remainder of 2009, study notes were added to the end of the online copy of the 2009 paper. This section explains those various study notes. The 2010 paper was an introduction to people-centered economics, including P-CED's treatise. The 2010 presentation was based on feedback and discussions with students during the 2009 conference.
