To protect the surrounding environment and watershed of the Longxi River, one of the largest tributaries of the Minjing River

To protect the surrounding environment and watershed of the Longxi River, one of the largest tributaries of the Minjing River. Environmental resources are under pressure because of the increased population density that resulted from Wenchuan Earthquake's displacement of over 2,000 villagers to the cities. The organization will engage the cities' residents in initiatives meant to raise awareness on the importance of protecting the river and resources.
