

Permaculture Association

The Permaculture Association is the national charity that supports people to learn about and use permaculture

Permaculture (AUSTRALIA/UK) is a branch of ecological design and ecological engineering which develops sustainable human settlements and self-maintained agricultural systems modeled from natural ecosystems. It is also a form of systems theory. The core tenets of permaculture are: Care of the Earth (Provision for all life systems to continue and multiply), Care of People (Provision for people to access those resources necessary for their existence), Setting Limits to Population and Consumption (By governing our own needs, we can set resources aside to further the above principles).
