

Oribags Innovations

Oribags Innovations is a social and environmental enterprise that manufactures hand-made paper bags, printing paper and jewelry

Oribags Innovations, established in 2008, is a social and environmental enterprise that manufactures hand-made paper bags, printing paper and jewellery from agricultural wastes. It recovers waste paper and natural fibres in an environmentally-friendly way to transform them into products for the local market. Agricultural waste is collected and purchased from local farmers and other groups. The raw material is processed at the incubation centre of the Uganda Industrial Research Institute (UIRI).
