Scientists Without Borders is a public-private partnership led by The New York Academy of Sciences. We are a web-based collaborative community dedicated to generating, sharing, and advancing innovative science and technology-based solutions to the world's most pressing global development challenges. Through our dynamic and free web platform, we harness the collective and creative problem-solving capacity of our worldwide community of experts and our strategic partner network to tackle specific scientific or technological challenges in areas of critical need. We enable our users to connect and exchange resources and expertise, and to forge cross-cutting collaborations and knowledge-sharing to accelerate progress and breakthroughs. We leverage technological connectivity to promote open innovation, collaboration, and transparency, so that solutions, information, and capacity can be accessed and sustainably deployed wherever needed.
