?Valle di Susa. Tesori di Arte e Cultura Alpina? is a project for a territorial, cultural e tourist, devolpment.

“Valle di Susa. Tesori di Arte e Cultura Alpina” is a cultural project that has reached 10 years of life, which was born on the initiative of the cultural associations of the Valley and was sustained by the local and regional institutions (Region, Mountain Community, Municipalities) and by several public and private promoters. The enhancement of the territory from the point of view of the landscape, of its artistic, historical and gastronomic heritage: this is the goal on which qualified and motivated professionals are successfully working, giving even more access to the vast art and culture heritage of this area that connect Italy to Europe and has been a witness of a large number of historical events. This history is inscribed in the landscape itself, where the natural monuments and natural parks intersect the monuments built by men such as the Sacra di San Michele abbey, Novalesa abbey, the fortress of Exilles and many others, setting themselves as extraordinary access gates to the numerous cultural, natural and sport paths of this Valley. For us, the communication of an area of such a great value has a fundamental significance, in fact we pay a particular attention to contents and images that can promote these places and also the reception facilities. We have realized proposals for thematic routes, all easily accessible, designed for people who love to discover nature, history, art. The shares of Valle di Susa. Tesori di Arte e Cultura Alpina:

management of cultural heritage integrated communication training/formation promoting tourism - culturalThe goals are: CULTURAL DEVELOPMENT KNOWLEDGE INTEGRATION ENTREPRENEURSHIP INNOVATION
