We have a firm commitment to promoting Organics, and have been at the forefront of introducing organic choice to the British consumer since 1971. All our own brand organic products are certified by the Soil association.

Alongside our ever expanding range of organic products we also specialise in Fairtrade, Vegetarian, Gluten-free and special dietary ranges.

Infinity foods stock a huge range of non food items including organic cosmetics and bodycare from some of the leading independent brands to a great range of environmentally friendly household products. We are a workers co-operative, which simply defined means that the company is jointly owned and democratically run by our members.

We offset our carbon while we work towards the ideal of a zero waste business. For us this means finding ways to balance air pollution and positively influencing the community. We do this through our support of the Orchards Projects, run by the Brighton Permaculture Trust.

As well as our support for organic movement we have been at the forefront of the campaign against GMO. We are a founder member of Genetic Food alert, which aims to monitor and campaign on this issue.
