The Foundation of the Order of Architects, Planners, Landscape Architects and Conservators of the province of Milan is a non-profit Organisation founded in 1998 with the aim of supporting initiatives intended to enhance and improve the quality of the architectural profession. The Foundation organises conferences, seminars, exhibitions, meetings, training courses as well as editorial and scientific research programmes. By partnering with such leading institutes and organisations as the Triennale of Milan, the Province of Milan and FAI (Fondo per Ambiente Italiano), along with associations active in the region such as Inarch and Inu, it is able to promote a wide range of activities covering a number of fields, from monitoring architecture competitions throughout the Milan area, to organising guided tours of modern buildings, all done in the interest of promoting the preservation of a valuable architectural heritage that is often little known to the general public. Sensitive to the new challenges inherent in a rapidly-evolving cultural context, the Foundation organises conferences and meetings conceived to provide a forum for drawing comparisons between the situation in Italy and that in the international community. Without wishing to supplant the work of other public or private Organisations that already operate in the industry, further aims of the Foundation include offering qualified services, maintaining a position of openness and willingness to acknowledge and address issues concerning our profession that require responses in terms of specific programmes of operational support, characterised by competence, professionalism and the ability to control situations. Continuity in communication has been, in recent years, a strong point thanks to the establishment of a press office that ensures a constant flow of information with professionals, with the Registrars of other Orders in Lombardy, Municipal Offices, Associations and Companies as well as with the press. This allows the widespread dissemination of activities carried out by the Foundation. It is a useful instrument for all those who are new to the profession; an important medium with and for architects as well as a meeting place, and not just virtual, of the historical and contemporary urban realities of our city. The President, Dr. Arch. Daniela Volpi
