Reset-Dialogues On Civilizations (Reset-DoC) is an Italian non-profit Association (since 2004), based in Rome. It promotes dialogue and intercultural understanding through public meetings both nationally, in Italy and at an international level, through publications and press work dedicated to more profound knowledge as well as the translation of notions and concepts from one into the other universe of understanding, from one into another culture - particularly between “East” and “West” in matters of culture, religion and politics. The Association was born in cooperation with the cultural Italian magazine Reset. We hope to become a reference point for all of those who want to go beyond the much-evoked clash of civilizations towards a pluralism in making. Our Scientific Committee is a network of intellectuals from different cultural backgrounds, who share the same liberal and humanistic values.
