

Art House

Art House is a project by Adrian and Melisa Paci based in Shkoder, Albania.

Art House is a project by Adrian and Melisa Paci who want to bring to their home town the contribution of international personalities of the arts and culture. In 2015 the Albanian artist Adrian Paci has opened his native house to the public, turning it into a place of exhibition and meeting between gallery owners, critics and artists. The artist says that Art House is "a common space, opened to cultural contributions from the art world that I attend since years, whereas even if Albania is no longer isolated as it was once, the communication with the rest of the world is still arduous."
